

SETUP GUIDE

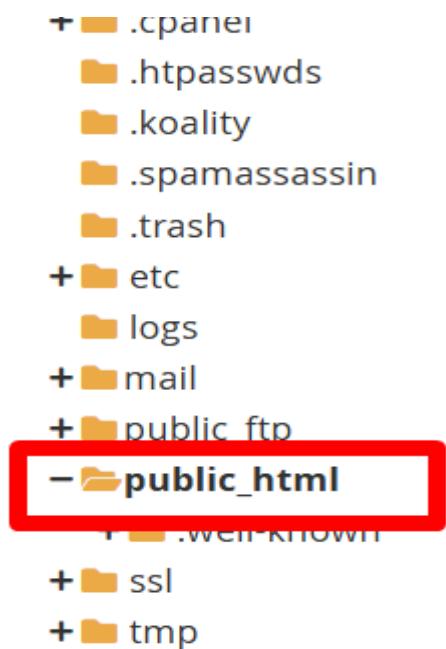

1. Log in to your cPanel account.

2. Go to File Manager.

The image shows the cPanel dashboard. On the left is a dark sidebar with various management tools: Tools, Applications, Sitejet Builder, Social Media Management, WordPress Management, and Site Quality Monitoring. The main area is a grid of icons. In the first row, the "File Manager" icon (a user icon with a folder) is highlighted with a red box. Other icons include Email Deliverability, Address Importer, Spam Filters, Encryption, BoxTrapper, Calendars and Contacts Configuration, Calendars and Contacts Sharing, Calendars and Contacts Management, and Email Disk Usage. In the second row, the "File Manager" icon is again highlighted with a red box. Other icons include Images, Directory Privacy, Disk Usage, Web Disk, FTP Accounts, FTP Connections, Anonymous FTP, Backup Wizard, and Git™ Version Control. In the third row, the "File Manager" icon is once again highlighted with a red box. Other icons include Databases and several database-related links.

Go to public_html/ directory where your domain is pointed.

3. Now, please load the zip file you have downloaded.

The screenshot shows an FTP file manager interface with the following details:

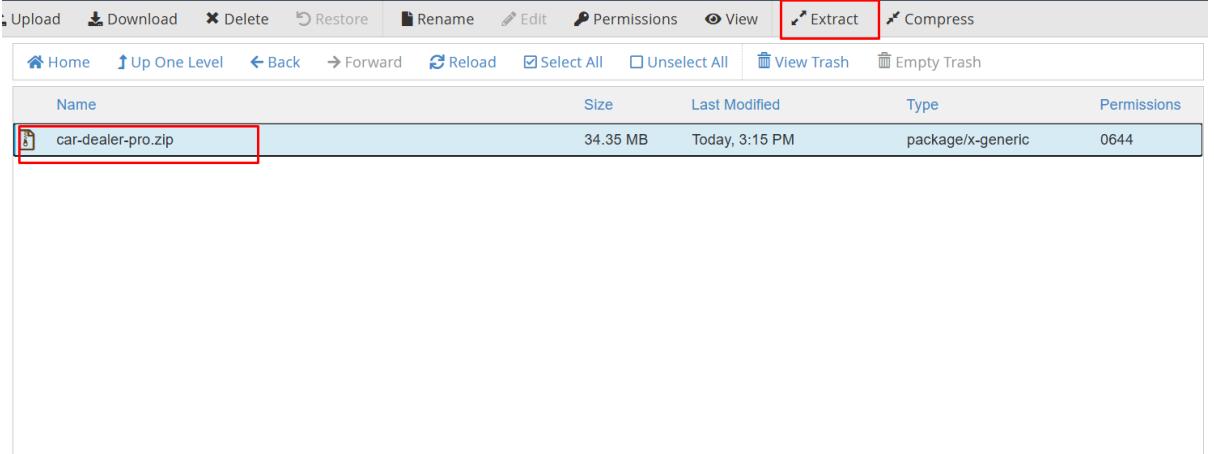

File Manager

Upload

car-dealer-pro.zip

Name	Size	Last Modified	Type	Permissions
car-dealer-pro.zip	34.35 MB	Today, 3:15 PM	package/x-generic	0644

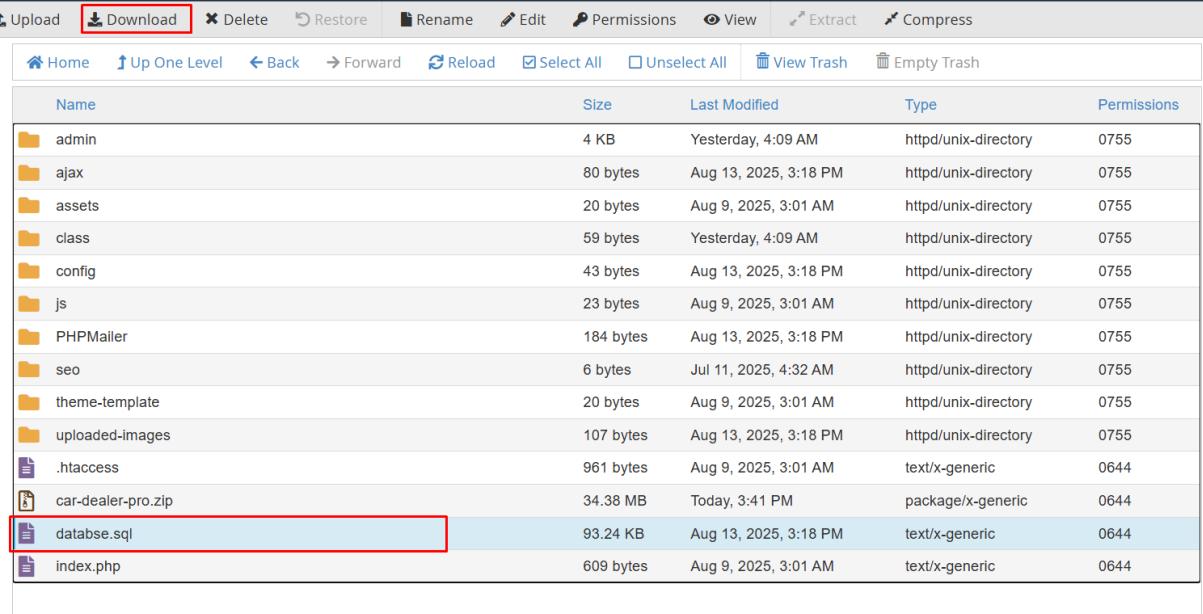

4. Once uploaded, unzip/extract the car-dealer-pro.zip file.

A screenshot of a file manager interface. At the top, there is a toolbar with various icons: Upload, Download, Delete, Restore, Rename, Edit, Permissions, View, Extract (which is highlighted with a red box), and Compress. Below the toolbar is a navigation bar with links: Home, Up One Level, Back, Forward, Reload, Select All, Unselect All, View Trash, and Empty Trash. The main area is a table with columns: Name, Size, Last Modified, Type, and Permissions. A single row is visible, representing the 'car-dealer-pro.zip' file. The file name is in a blue header cell. The table shows the file is 34.35 MB in size, was modified today at 3:15 PM, is a package/x-generic type, and has permissions 0644. A red box highlights the 'Extract' button in the toolbar and the 'car-dealer-pro.zip' file in the list.

Name	Size	Last Modified	Type	Permissions
car-dealer-pro.zip	34.35 MB	Today, 3:15 PM	package/x-generic	0644

5. Now download the database.sql file. You need to upload it from phpMyAdmin. Don't worry! The next steps explain how to do it.

A screenshot of a file manager interface. At the top, there is a toolbar with various icons: Upload, Download (which is highlighted with a red box), Delete, Restore, Rename, Edit, Permissions, View, Extract, and Compress. Below the toolbar is a navigation bar with links: Home, Up One Level, Back, Forward, Reload, Select All, Unselect All, View Trash, and Empty Trash. The main area is a table with columns: Name, Size, Last Modified, Type, and Permissions. There are multiple rows listed, including 'admin', 'ajax', 'assets', 'class', 'config', 'js', 'PHPMailer', 'seo', 'theme-template', 'uploaded-images', '.htaccess', 'car-dealer-pro.zip', 'database.sql' (which is highlighted with a red box), and 'index.php'. The table shows the 'database.sql' file is 93.24 KB in size, was modified on Aug 13, 2025, at 3:18 PM, is a text/x-generic type, and has permissions 0644. A red box highlights the 'Download' button in the toolbar and the 'database.sql' file in the list.

Name	Size	Last Modified	Type	Permissions
admin	4 KB	Yesterday, 4:09 AM	httpd/unix-directory	0755
ajax	80 bytes	Aug 13, 2025, 3:18 PM	httpd/unix-directory	0755
assets	20 bytes	Aug 9, 2025, 3:01 AM	httpd/unix-directory	0755
class	59 bytes	Yesterday, 4:09 AM	httpd/unix-directory	0755
config	43 bytes	Aug 13, 2025, 3:18 PM	httpd/unix-directory	0755
js	23 bytes	Aug 9, 2025, 3:01 AM	httpd/unix-directory	0755
PHPMailer	184 bytes	Aug 13, 2025, 3:18 PM	httpd/unix-directory	0755
seo	6 bytes	Jul 11, 2025, 4:32 AM	httpd/unix-directory	0755
theme-template	20 bytes	Aug 9, 2025, 3:01 AM	httpd/unix-directory	0755
uploaded-images	107 bytes	Aug 13, 2025, 3:18 PM	httpd/unix-directory	0755
.htaccess	961 bytes	Aug 9, 2025, 3:01 AM	text/x-generic	0644
car-dealer-pro.zip	34.38 MB	Today, 3:41 PM	package/x-generic	0644
database.sql	93.24 KB	Aug 13, 2025, 3:18 PM	text/x-generic	0644
index.php	609 bytes	Aug 9, 2025, 3:01 AM	text/x-generic	0644

6. Remember, you have downloaded the database.sql. That is the database for your website.

To upload that database, you need to create a database first.

Now, from the cPanel dashboard, click on Manage My Databases.

The screenshot shows the cPanel dashboard with several sections. At the top, there's a search bar labeled "Search Tools (/)". Below it, the "Databases" section contains links for "Databases", "phpMyAdmin", "Manage My Databases" (which is highlighted with a red box), and "Remote Database Access". In the "Domains" section, there are links for "Wordpress Management", "Social Media Management", "Zone Editor", "Site Publisher", "Domains", "Dynamic DNS", "Sitejet Builder", and "Redirects". The "Metrics" section includes "Visitors", "Site Quality Monitoring", and "Errors".

7. Once you click on “Manage My Database”, you will be redirected to a new page where you will find an option to create a database. Create a new database with a name you want.

Once created, copy the database name and save it in a notebook for future reference. You need to set the database name in code later.

Create New Database

New Database:

A screenshot of a "Create New Database" form. It has a text input field containing "yourdatabasename" which is highlighted with a red box. Below the input field is a blue "Create Database" button.

8. On the “Manage My Databases” page, you will find an option to create a database user with a password. Create a new user with a username and a password, and copy the username and password and save them in the same notebook. So, in the notebook, you should have 3 things: **database name, username, and password**. Once copied, proceed to the next step.

Database Users

Add New User

Username

Password

Password (Again)

Strength ⓘ
Very Strong (100/100)

[Password Generator](#)

[Create User](#)

9. Now we need to attach the newly created user to the newly created database. On the “Manage My Databases” page, you will find an option to add a user to a database. Add the user to the database with privileges.

Add User To Database

User

Database

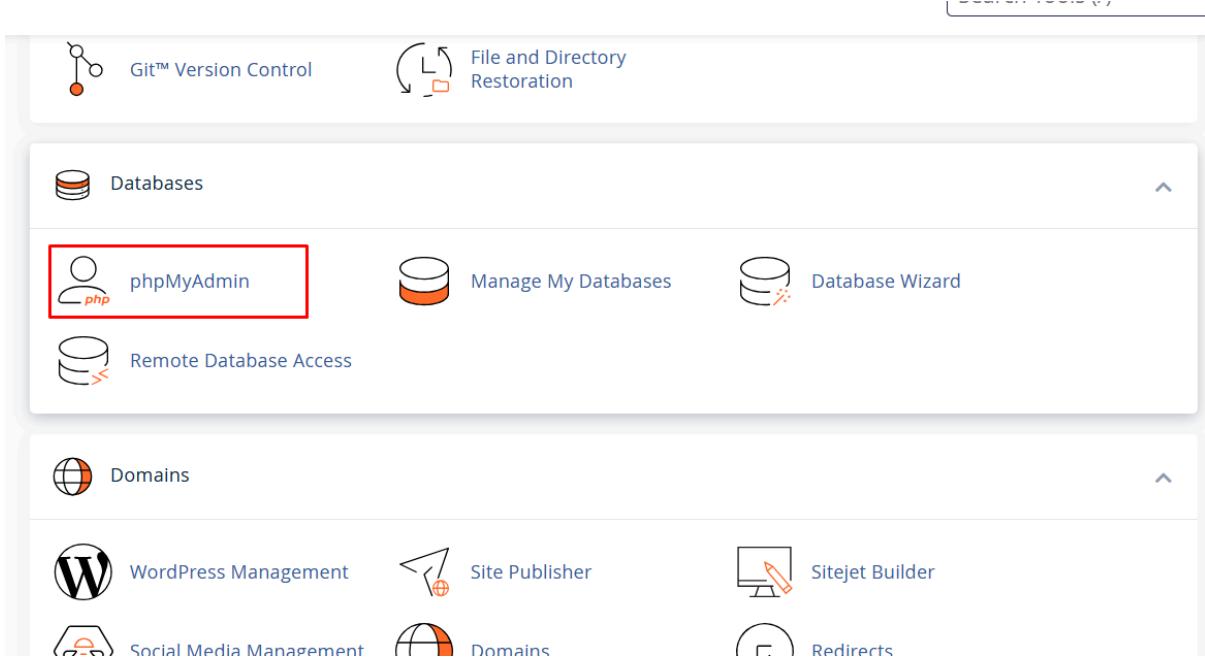

[Add](#)

10. Once you select the database, select the user and click on the Add button, you will be asked to add privileges of the user to the database. Click on “All Privileges” and click on the “Make Changes” button to save the privileges of the user on the database. Well done! You have successfully created a database with a user.

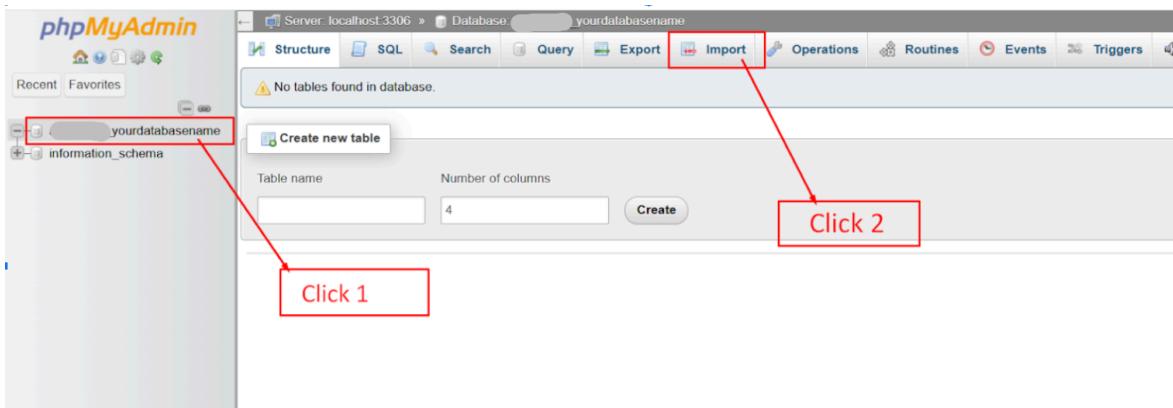

<input checked="" type="checkbox"/> ALL PRIVILEGES	
<input checked="" type="checkbox"/> ALTER	<input checked="" type="checkbox"/> ALTER ROUTINE
<input checked="" type="checkbox"/> CREATE	<input checked="" type="checkbox"/> CREATE ROUTINE
<input checked="" type="checkbox"/> CREATE TEMPORARY TABLES	<input checked="" type="checkbox"/> CREATE VIEW
<input checked="" type="checkbox"/> DELETE	<input checked="" type="checkbox"/> DROP
<input checked="" type="checkbox"/> EVENT	<input checked="" type="checkbox"/> EXECUTE
<input checked="" type="checkbox"/> INDEX	<input checked="" type="checkbox"/> INSERT
<input checked="" type="checkbox"/> LOCK TABLES	<input checked="" type="checkbox"/> REFERENCES
<input checked="" type="checkbox"/> SELECT	<input checked="" type="checkbox"/> SHOW VIEW
<input checked="" type="checkbox"/> TRIGGER	<input checked="" type="checkbox"/> UPDATE

Make Changes **Reset**

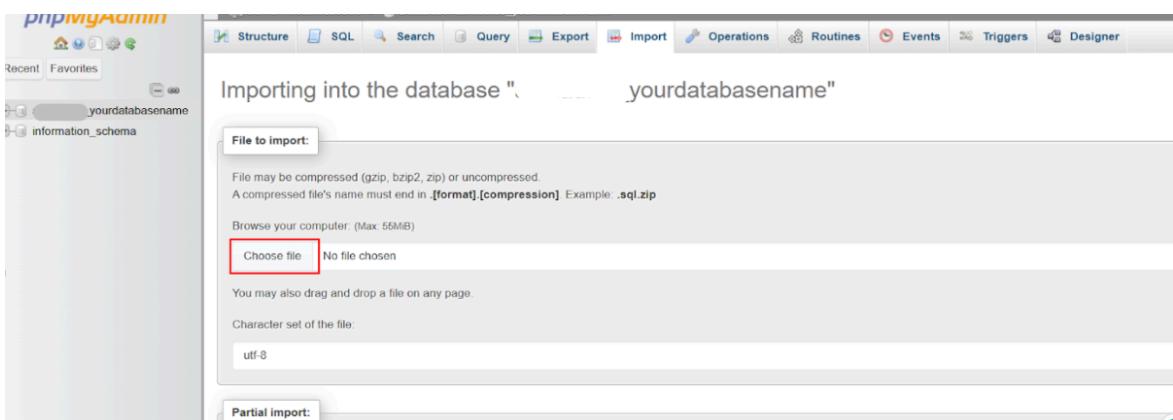

11. Now, from the cPanel dashboard, go to phpMyAdmin.

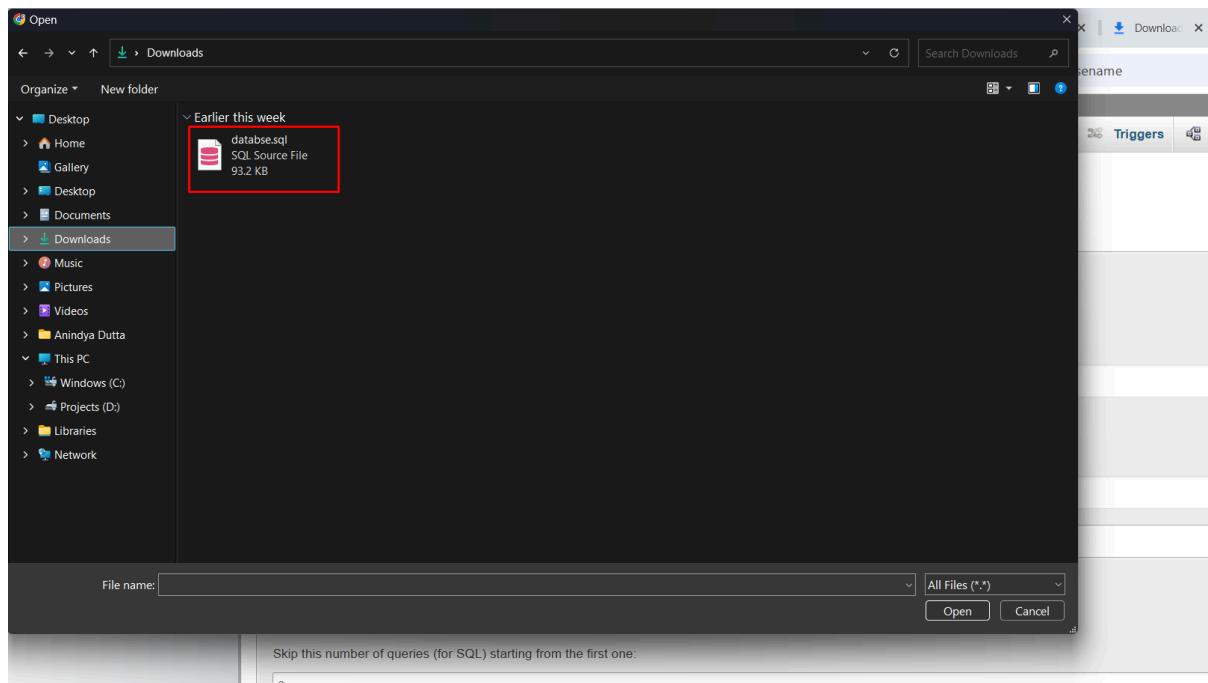

- Once you are landed on the phpMyAdmin, you will see your database on the left panel bar. Click on the database name. Then click on "Import" as shown below.

- Remember the database.sql file. Now you need to upload the database.sql file here. Click on Choose file.

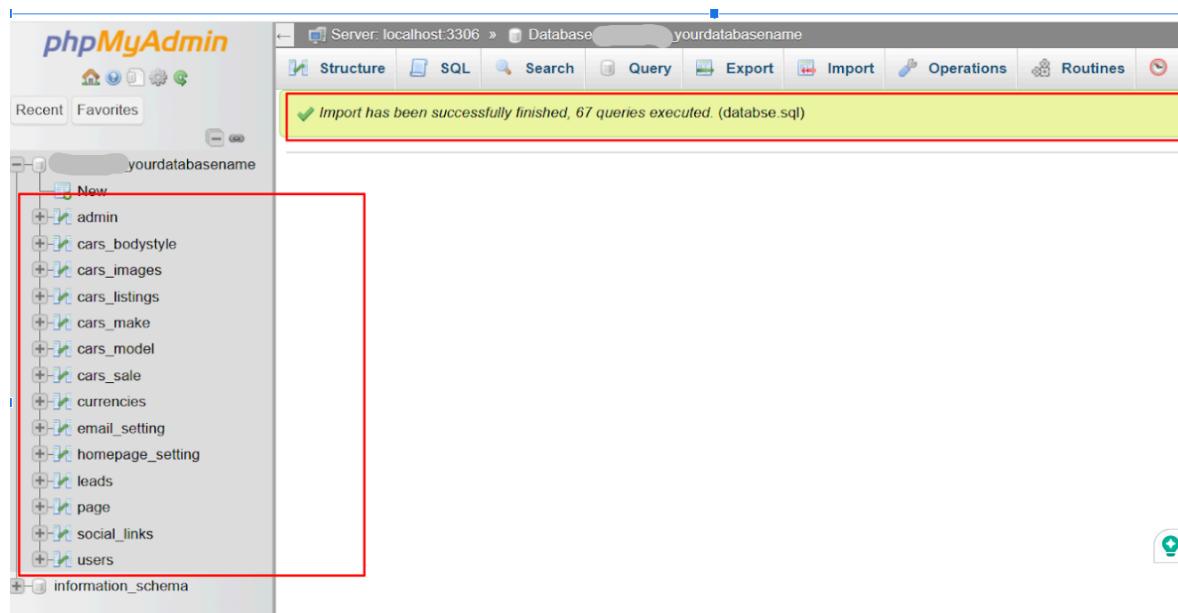

14. Select the downloaded database.sql file from the download location. Then click on the Open button.

15. Scroll down to the bottom of the page and click on import.

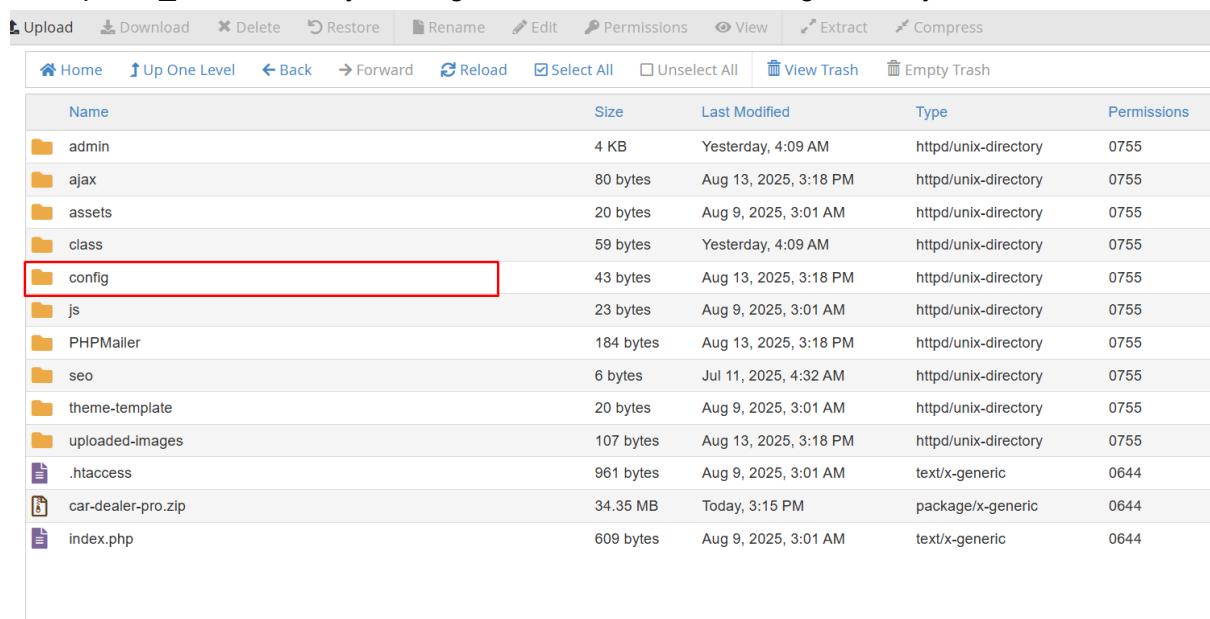

16. Once the database is imported successfully, you will see all the tables on the left side.
 Great! Your database setup is completed. Now, let's move to the coding part to connect the code with the database.

The screenshot shows the phpMyAdmin interface. At the top, it says "Import has been successfully finished, 67 queries executed. (database.sql)". The left sidebar lists various database tables under the "yourdatabasename" database, including admin, cars_bodystyle, cars_images, cars_listings, cars_make, cars_model, cars_sale, currencies, email_setting, homepage_setting, leads, page, social_links, and users. The "information_schema" database is also listed at the bottom. A red box highlights the list of tables.

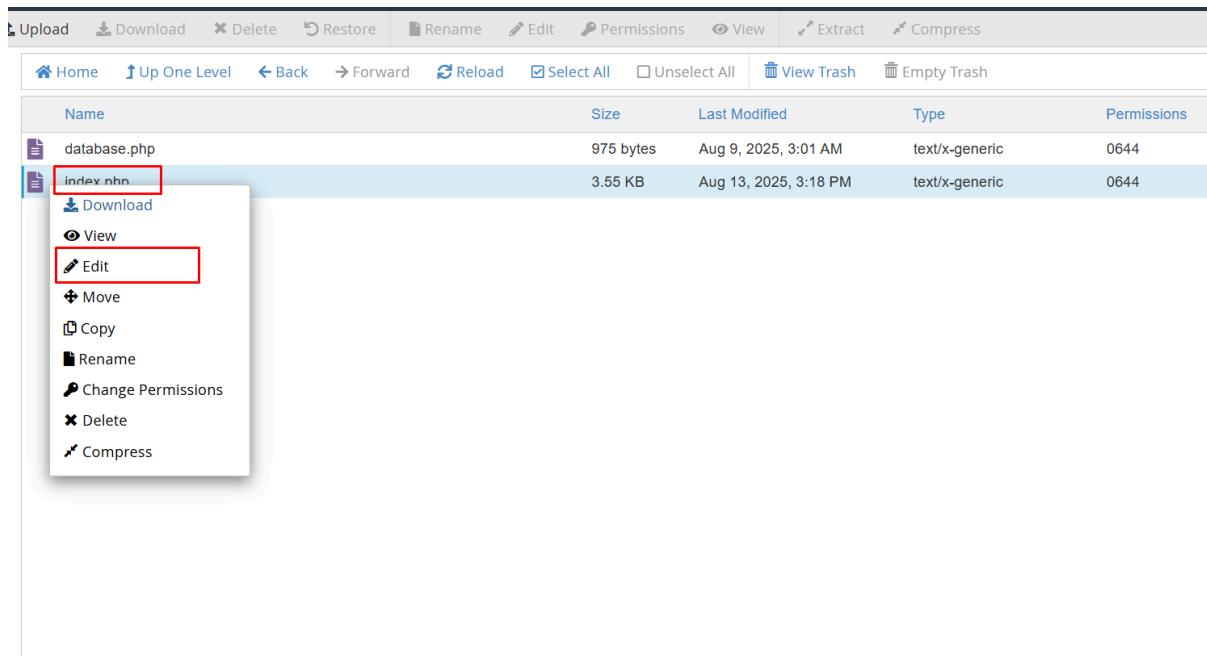

17. Now, go to the “File Manager” menu again from the CPanel dashboard page. Then go to the public_html/ directory. Then go to the inside of the config directory:

The screenshot shows the File Manager interface. The top navigation bar includes options like Upload, Download, Delete, Restore, Rename, Edit, Permissions, View, Extract, and Compress. Below the navigation is a toolbar with Home, Up One Level, Back, Forward, Reload, Select All, Unselect All, View Trash, and Empty Trash. The main area displays a list of files and directories in the "config" folder. The "config" folder is highlighted with a red box. Other items in the list include admin, ajax, assets, class, js, PHPMailer, seo, theme-template, uploaded-images, .htaccess, car-dealer-pro.zip, and index.php. The table columns are Name, Size, Last Modified, Type, and Permissions.

Name	Size	Last Modified	Type	Permissions
admin	4 KB	Yesterday, 4:09 AM	httpd/unix-directory	0755
ajax	80 bytes	Aug 13, 2025, 3:18 PM	httpd/unix-directory	0755
assets	20 bytes	Aug 9, 2025, 3:01 AM	httpd/unix-directory	0755
class	59 bytes	Yesterday, 4:09 AM	httpd/unix-directory	0755
config	43 bytes	Aug 13, 2025, 3:18 PM	httpd/unix-directory	0755
js	23 bytes	Aug 9, 2025, 3:01 AM	httpd/unix-directory	0755
PHPMailer	184 bytes	Aug 13, 2025, 3:18 PM	httpd/unix-directory	0755
seo	6 bytes	Jul 11, 2025, 4:32 AM	httpd/unix-directory	0755
theme-template	20 bytes	Aug 9, 2025, 3:01 AM	httpd/unix-directory	0755
uploaded-images	107 bytes	Aug 13, 2025, 3:18 PM	httpd/unix-directory	0755
.htaccess	961 bytes	Aug 9, 2025, 3:01 AM	text/x-generic	0644
car-dealer-pro.zip	34.35 MB	Today, 3:15 PM	package/x-generic	0644
index.php	609 bytes	Aug 9, 2025, 3:01 AM	text/x-generic	0644

18. Right-click on the index.php, and a menu will show. Click on the “Edit” menu to open the index.php in edit mode.

19. Now change the following information according to you.

- Set the \$SITE_URL value with your domain/subdomain URL.
- Set the \$DB_HOST value to localhost or the IP address
- Set the \$DB_USERNAME value with the username you have created and copied to the notebook. (On point 9 above)
- Set the \$DB_PASSWORD value with the password you have copied to the notebook. (On point 9 above)
- Set the \$DB_NAME value with the database name you have copied to the notebook. (On point 9 above)

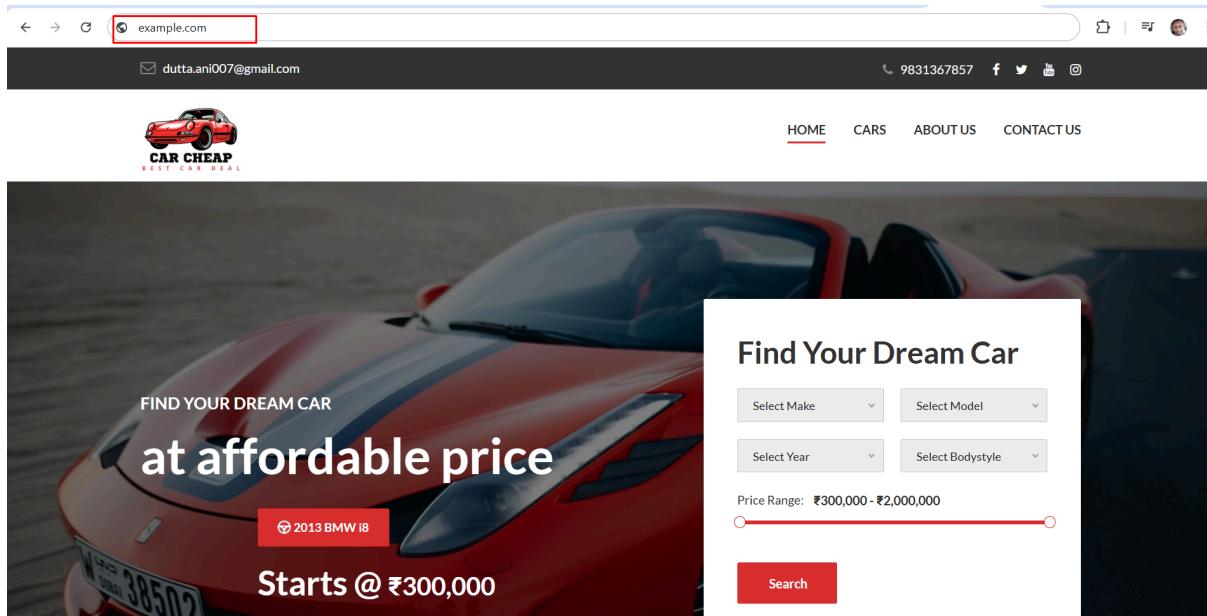

Keyboard shortcuts

Search Back Forward Refresh 13px P

```
1 <?php
2 // SET YOUR WEBSITE URL HERE.
3 // Example: https://www.example.com (FOR MAIN DOMAIN)
4 // Example: https://subdomain.example.com (FOR SUB DOMAIN)
5 // Example: https://www.example.com/subfolder (FOR SUB FOLDER)
6 $SITE_URL = "https://www.example.com";
7
8 // YOUR DATABASE HOST
9 $DB_HOST = "your database host here";
10
11 // YOUR DATABASE USERNAME
12 $DB_USERNAME = "your database username here";
13
14 // YOUR DATABASE PASSWORD
15 $DB_PASSWORD = "your database password here";
16
17 // YOUR DATABASE NAME
18 $DB_NAME = "your database name here";
19
20 // FUEL TYPE LIST
```

Well done! You have completed the setup. Now need to check if the site is opening.

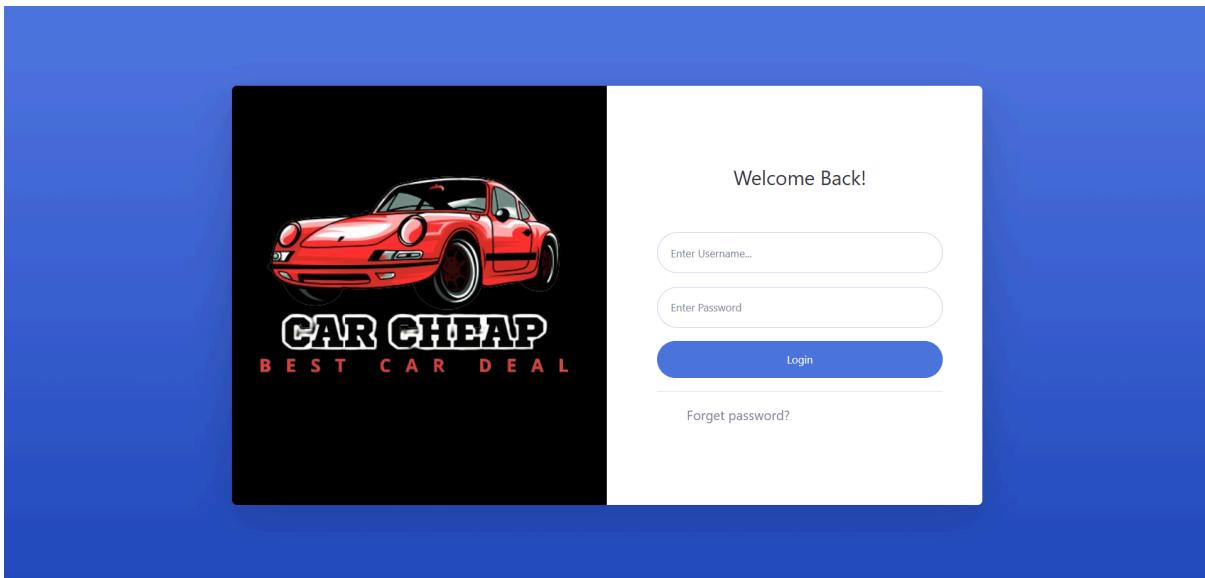

Visit the site URL (\$SITE_URL) in the browser now. It should look like this:

Now, let's move on to the admin panel.

Once the setup is done, first visit the admin panel by adding /admin to your website URL
For example: <https://www.yourwebsite.com/admin>

Once you open the admin panel, you will be redirected to the login page.

Use the following details for login:

Username: admin

Password: password

After logging in, you will be redirected to the business profile page to set up your business information. You can change your username here or later, which is used for login.

Setup your business information

Business Logo:

TSX	Acura	ACTIVE	<button>EDIT</button> <button>DELETE</button>
TL	Acura	ACTIVE	<button>EDIT</button> <button>DELETE</button>
ZDX	Acura	ACTIVE	<button>EDIT</button> <button>DELETE</button>

Body Styles: Pre-installed with all popular body styles. You can also add a new body style, edit, or delete an existing body style.

The screenshot shows the 'Body Styles' section of the application. On the left is a dark sidebar with navigation links: Dashboard, Pages, Cars, Makes, Models, Body Styles (which is highlighted in blue), Customers, Leads, Settings, and Logout. The main area has a title 'Body Styles' and a 'Add New' button. Below is a table with columns: Image, Name, Status, and Action (with 'EDIT' and 'DELETE' buttons). The table lists nine body styles: Cab, Convertible, Coupe, Hatchback, Minivan, Pickup, Sedan, SUV, and Van, each with its corresponding icon and status as 'ACTIVE'.

Customers: All buyers and sellers of cars will be represented here.

The screenshot shows the 'Customers' section of the application. The sidebar is identical to the previous one. The main area has a title 'Customers' and a note 'All buyers and sellers.' Below is a table with columns: Name, Email, Phone, and Address. The table lists 13 entries, including 'Car Owner', 'Anindya Dutta', 'amit', 'khan', 'atanu', 'Ujjwal Maiti', 'test@test.com', 'New Buyer', 'jon@gmail.com', and 'Abdul'. The 'Address' column contains various test addresses.

Leads: All leads for cars from the website will be displayed here.

The screenshot shows the 'Leads' section of the application. On the left is a dark sidebar with navigation links: Dashboard, Pages, Cars, Makes, Models, Body Styles, Customers, Leads (which is selected and highlighted in blue), and Settings. Below these is a 'Logout' link. The main content area has a title 'Leads' and a subtitle 'All leads from website that looking for cars.' It includes a dropdown for 'entries per page' set to 10, a search bar, and a table with columns: Car, Name, Email, Phone, and Message. A single entry is listed: WBANU53519C121594, Ujjwal Maiti, maitiujjwal@gmail.com, 8343012814, and edsdssdf. Below the table is a message 'Showing 1 to 1 of 1 entries'.

Settings: Settings has 5 tabs.

1. Business Information tab: Manage your business information and currency here.
2. Social links: Manage your social links here.
3. Home Page Setting: Manage your home page here.
4. Email Setting: Manage your email settings to send emails from the website.
5. Change password: Update your admin password here.

The screenshot shows the 'Settings' page with the 'Business Information' tab selected. The top navigation bar includes links for Business Information, Social Links, Home Page Setting, Email Setting, and Change Password. The main content area is divided into sections: 'Business Logo' (with a placeholder 'Drag & Drop Images Here' and 'Or Select Image'), 'Business Information' (with fields for Username, Email, and Phone), 'Business Address' (with fields for Address, City, State, Country, Zip), and 'Additional Settings' (with fields for Currency and Distance). At the bottom is a 'Save' button.
